

I wanna write songs for you,  
And see you smile when I play them, too  
I'd have a concert and you would hear  
A thousand voices sing my love for you loud and clear

We'd live our lives living day by day  
A day together or a day away  
When you're alone you know you have my heart  
And that time will fly while we're apart

In every perfect life, I see myself with you  
In every perfect life, I see myself with you

We would run marathons  
And always have a trip to go on  
We'd live in a house that we designed  
We'd do things right and we'd take our time

In every perfect life, I see myself with you  
In every perfect life, I see myself with you

(Instrumental)

I'd kiss your lips just to wake you up  
I'd start my day out right by filling your cup  
And when at night we both go to bed  
Thoughts of you will fill my head still
